

Criteria for Community Council Fund based on a Talybont Energy donation

1. The fund is only used for projects proposed by community members that provide either a social or environmental benefit to the community.
2. The fund is not used for recurrent running or maintenance costs or paying people.
3. Any funded projects do not conflict directly with Talybont Energy's principal aims of reducing our community's energy and increasing the use of renewable energy sources.
4. The Community Council takes full responsibility for how the donated money is used.
5. The Council provides Talybont Energy with a short report of the projects funded at the end of each year. Talybont Energy will then review any future donations based on this report together with their own financial commitments at the time.

Signed on behalf of the Community Council:
